

Plant theft is on the increase.

Current estimates say that it costs the UK **£1million each week***

Keep your business
one step ahead >>

We can now provide you with the latest technology in vehicle tracking systems from **foretrack**

Although the cost of replacing stolen property is often insured it is the uninsured cost of downtime and idle crews along with the affect of increased insurance premiums that could have a serious affect on the profitability of some UK businesses.

foretrack's live GPS vehicle tracking system, provides you with total, around the clock visibility of your mobile workforce. With over 29 years experience in specialist communication solutions foretrack is a fully integrated service provider. Their web-based solution undergoes constant innovation and development meaning that you will always benefit from maximum return on your investment.

Using UK developed technology, the foretrack online system and associated products deliver outstanding quality and value. Their ever-increasing customer base serves testament to foretrack's excellent reputation for service and support.

foretrack T100 - High Performance GPS Tracking for Fleet Management

- > **High sensitivity GPS** integrated for installation without external antennas
- > **GSM/GPRS** tri-band communications for economical global operation
- > **Rechargeable internal battery** enables 'fit and forget' applications, or extended long term operation when disconnected from power
- > **Rugged enclosure and connector system** withstands extreme environmental conditions found on commercial vehicles
- > **Compact**, self-contained and easily installed, with internal antennas and four bolt mountings
- > **Low installation costs**, high reliability and no requirement for any additional enclosure

* Facts advised by Home Office Construction & Agricultural and Plant Security Guidance Document 50/07
